

Outsourced CFO Services

As businesses become more complex, it is increasingly difficult for business owners to assess the trends affecting operations or to find time to do so. In addition, many successful companies cannot or choose not to maintain a full internal accounting staff to meet their needs. Accordingly, many successful companies utilize outsourced professionals for their accounting and finance needs. To meet these needs, we customize our Outsourced CFO Services to align with the needs of your business, and to give you the help and support you require.

Our firm provides accounting, financial management and consulting services on a part-time or interim basis. In many cases, business owners find that outsourced financial services are most cost effective than hiring full-time accounting or financial employees. They also find that both the quality and timeliness of financial management information is improved. Bottom line is that we assist in improving the performance of your business, and bring peace of mind to the business owner.

Some examples of our services include:

Financial Processes

- Design and implementation of accounting systems
- Financial reporting
- Internal control review/design
- Ratio analysis
- Key performance indicators
- Tax compliance

Strategic Planning

- Benchmarking/ Forecasting/Budgeting
- Tax planning
- Succession and Retirement planning
- Annual business planning
- Compensation planning
- Benefits planning

Relationship Management

- Family members
- Key management
- Professional service providers
- Vendors and Customers

We have the capability of offering the necessary assistance to facilitate the achievement of your business goals. Choosing Strothman & Company for your Outsourced CFO Services will provide an outside perspective for your business and will also be a form of protection against internal fraud.
